Experience

Software Engineer (Back-End)

Alibaba Travels Co.

November 2021-Present, Tehran

I'm working in Domestic Flight team as a backend software engineer.

We have many microservices for flight booking services.

I have developed a complete solution of observability and logging for all purchases using elastic-search, kibana, serilog.

Automatic refund service also developed by our team.

We are in edge of technology in Alibaba Travels:

.NET 7 / RabbitMQ / Grafana / Prometheus / Kubernetes

Senior Software Developer (Back-End)

Geeks LTD

August 2021-September 2021, UK(Remote)

I was working on tasks system in GTech team, contract for two months.

Founder and Technical Lead

Binande Internet Magazine

April 2019-Present, Tehran

Development of an internet magazine with following features:

- Blog and news
- Radio and podcasts about programming
- Online courses

Teaching the ASP.NET Core is one of courses by me at binande.ir.

Technologies we used in this project:

- ASP.NET Core 5 MVC / Restful Web API
- Identity Server 4 for Authentication and Authorization
- Blazor Server Side 5 for old admin area
- Angular 11 App for new admin area
- SQL Server 2019
